EDUCATION

B.S. Finance & Information Systems, University of Maryland, College Park

Aug 2022 - May 2025

GPA: 3.9/4.0

B.A. Business Technology Administration, University of Maryland, Baltimore County

Aug 201 - May 2022

GPA: 4.0/4.0

Relevant Coursework: Database System Analytics & Design, Business Analytics, Quantitative Financial Analysis, Futures & Options

EXPERIENCE

Chewy

Plantation, FL

Financial Analyst

June 2025 - Present

- Led the weekly projection model bridging merchandising and corporate finance, reconciling inputs cross-functionally across 9 teams and 3 datasets into a summarized executive leadership view with key insights, held to <3% variance to actuals
- Automated G&A and P&L reporting across 10 departments by integrating Oracle/Hyperion data into VBA-driven Excel models, eliminating 15+ hours of manual work per close cycle and making forecast input seamless for business partners
- Rebuilt reporting models from scratch, re-architecting a tangled, error-prone legacy process into a framework that traced every input to its source and flexed easily to new verticals, inputs, and adjustments, cutting cycle time by 50%
- Built an AI-powered weekly net-sales dashboard for the CFO, delivering a view of quarter landing used in earnings-call prep
- Served as the team's primary resource for ad hoc analysis across workstreams, including backtesting a new pricing forecast that validated closely against actuals and rebuilding a seasonality report feeding teams' annual forecasting and planning
- Developed the team's monthly P&L source-of-truth model, reconciling Snowflake and Hyperion data across grains, surfacing rate/mix drivers, and generating a preliminary net-sales read to flag landing and direct commentary before close

Carrier Global Corporation

Palm Beach Gardens, FL

Financial Planning & Analysis Intern

May 2023 - Aug 2023

- Streamlined financial reporting/forecasting by efficiently classifying 1000+ entities using VBA, reducing time spent by 75%
- Enhanced investor relations by identifying and calculating sustainable KPI figures included in earnings reports and slide decks
- Improved data accuracy and forecasting by performing quality checks and cleansing procedures on noisy financial datasets

University of Maryland, Robert H. Smith School of Business

College Park, Maryland

Teaching Assistant - Quantitative Models for Management Decisions

Aug 2023 - May 2025

- Supervised and assisted 50+ students through a quantitative modeling course about formulating and optimizing mathematical models of real-world problems, strengthening both the critical thinking and analytical problem-solving skills of students
- Received positive feedback from students for clear communication and ability to simplify intricate modeling problems
- Held weekly office hours for 20+ students, guiding them through homework assignments and exam preparations

BigThink AI

College Park, Maryland

Operations Manager

May 2023 - May 2025

- Curated workshop content for Bitcamp, UMD's largest hackathon (2000+ attendees), on ASL gesture classification using AI
- Hosted hands-on ML workshops for 100+ students covering modern libraries like pandas, scikit-learn, and TensorFlow

PROJECTS

Aftertaste | Food Journey App

Jan 2026

- Food diary app for travel dining, with photo logging and comparison-based rating (Google Places / Supabase / React Native)
- Built an LLM-powered bulk-import pipeline (Claude Haiku edge function, structured JSON output) that parses freeform notes, CSV/Excel, and Google Maps exports into geocoded entries via fuzzy name matching, at ~1¢ per 300-place import
- Designed a pairwise-comparison ranking engine that places each new restaurant via binary search against same-tier peers in ≤5 comparisons, with tie groups and score redistribution, replacing arbitrary star ratings with consistent relative ordering

Personal Website | Travel Portfolio

Jul 2024

- Built a responsive travel-themed portfolio from scratch in vanilla JS with no frameworks or assets: a canvas-rendered dotted world map with animated flight paths, split-flap departure-board animations, and a fully synthesized Web Audio sound engine

UMD Club Baseball Merchandise

Feb 2024

- Built a merchandise storefront for UMD club baseball using Flask/Python and MySQL for inventory and order management

SKILLS AND INTERESTS

Skills: Oracle Hyperion, Tableau, Power BI, Microsoft Office/Advanced Excel, Visible Analyst, Visio, Excel Power Query

Programming: VBA, Python, pandas, SQLAlchemy, MySQL, Flask, CSS, HTML, Java, JavaScript, React, Git, React Native, Expo

Interests: Golf, Weightlifting, Chess, Hiking, Poker, Cooking, Basketball, Football (Chargers), Pickleball, Board Games, Travel
